# About Zero7 Consulting

## Zero7 Consulting

Zero7 Consulting is a specialist organisational development consulting practice, supporting organisations to establish their own people management systems, processes and guiding frameworks.

### Zero7 Consulting provides:

- Solutions to build business capability through the performance of your people
- Solutions to address people issues that have a detrimental impact on your business

With the focus, flexibility and quality that an independent practice supports, Zero7 Consulting provides solutions for organisations wanting to develop their internal people management expertise, processes, practices and programs.

### Working with medium to large organisations, Zero7 Consulting applies expertise in Organisational Psychology in number of ways:

- Reviewing and developing people management practices.
- Enabling organisations to achieve change, develop their people and expand their overall ability to achieve results through their people.
- Addressing people issues within the organisation, such as turnover, absenteeism and conflict.
- Aligning people management systems and practices with the business values and strategy.

### Points of difference:

- All services are tailored to the specific needs of the organisation.
- Services are provided directly by the principal.
- You pay only for the work we actually do – we don't burden you with "allocated" costs that come from minimum billing targets.
- Reliable personal service, strong relationships and integrity.
